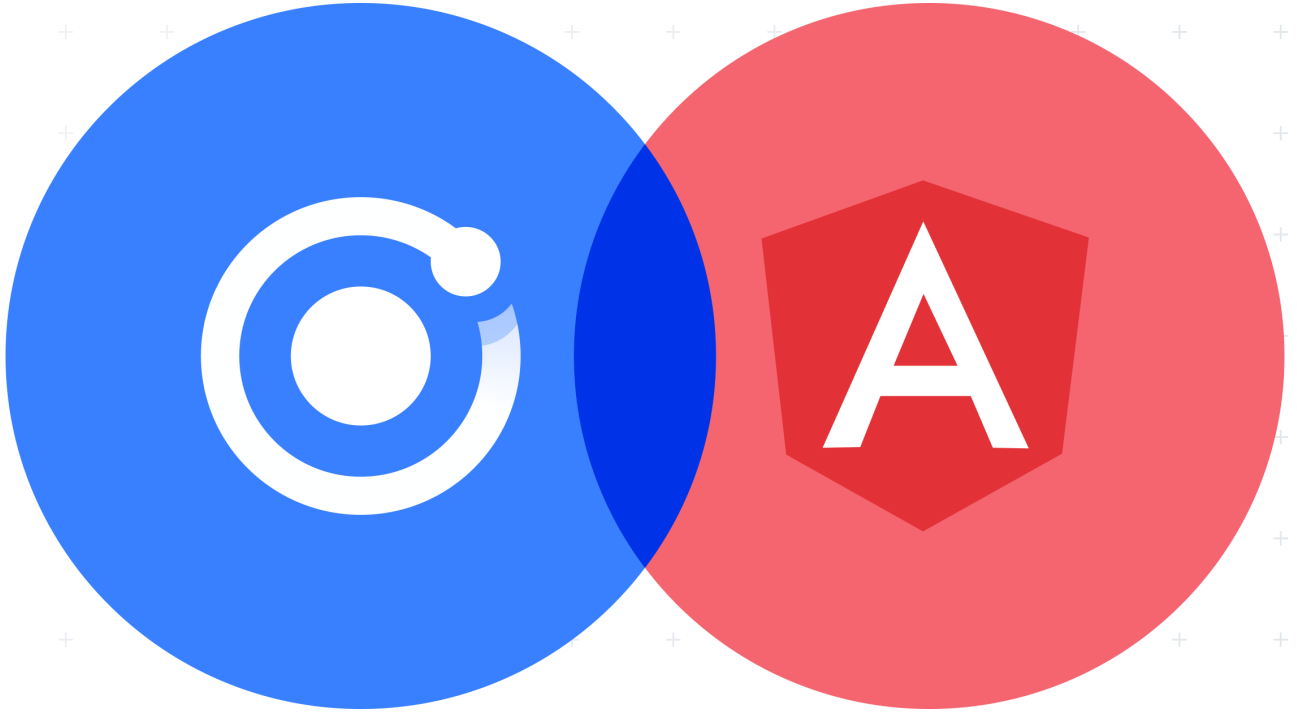
Ionic in 30

with Angular

Mike Hartington | @mhartington



What is Ionic?

Build native mobile apps and PWAs with the web

High-quality components, animations, gestures

Cross platform run time via Capacitor

Cloud-based platform for CI/CD

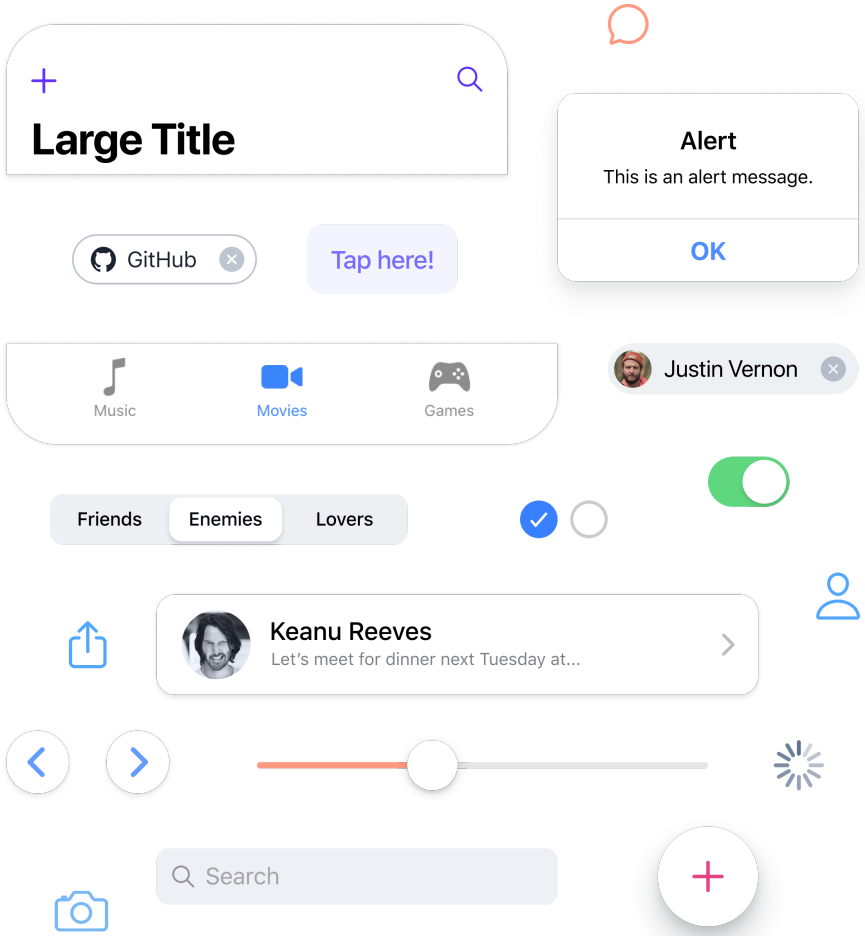
@mhartington

Components and Interaction

Tabs, buttons, cards, grids, oh my!

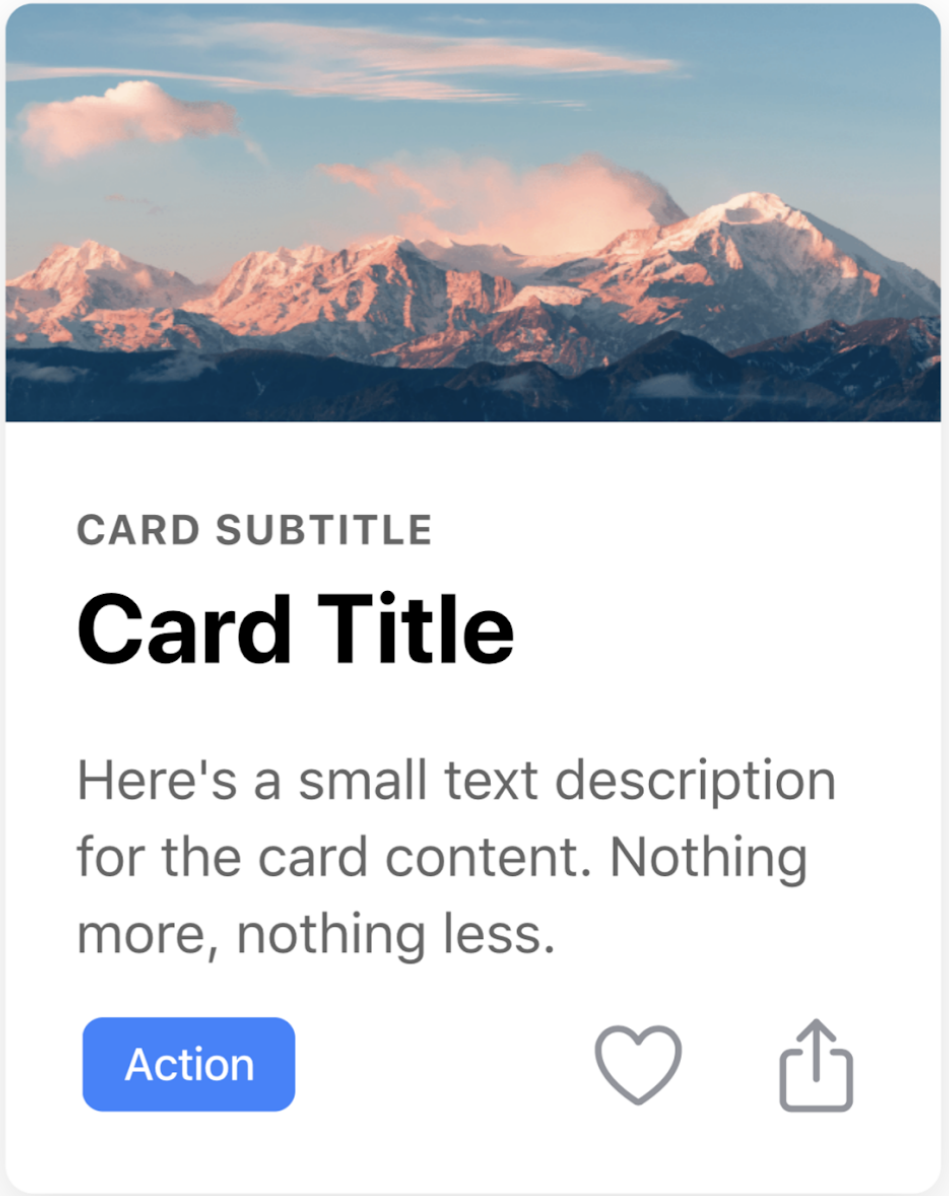
Gestures and Animations for interaction

CSS utilities and custom properties

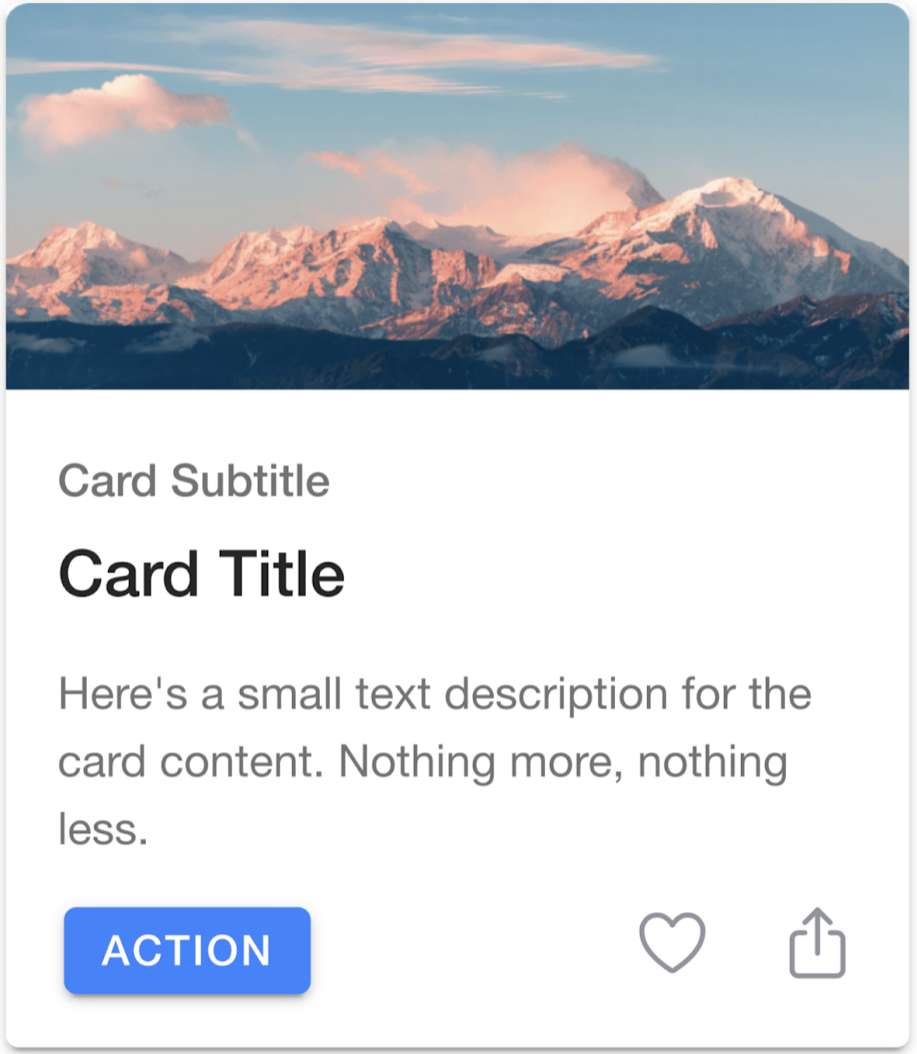


@mhartington

```
<ion-card>
 <img src="assets/myImg.png" />
 <ion-card-content>
   <p>
     Here's a small text
     description for the card
     component. Nothing more,
     nothing less.
   </p>
 </ion-card-content>
</ion-card>
```



```
<ion-card>
 <img src="assets/myImg.png" />
 <ion-card-content>
   <p>
     Here's a small text
     description for the card
     component. Nothing more,
     nothing less.
   </p>
 </ion-card-content>
</ion-card>
```

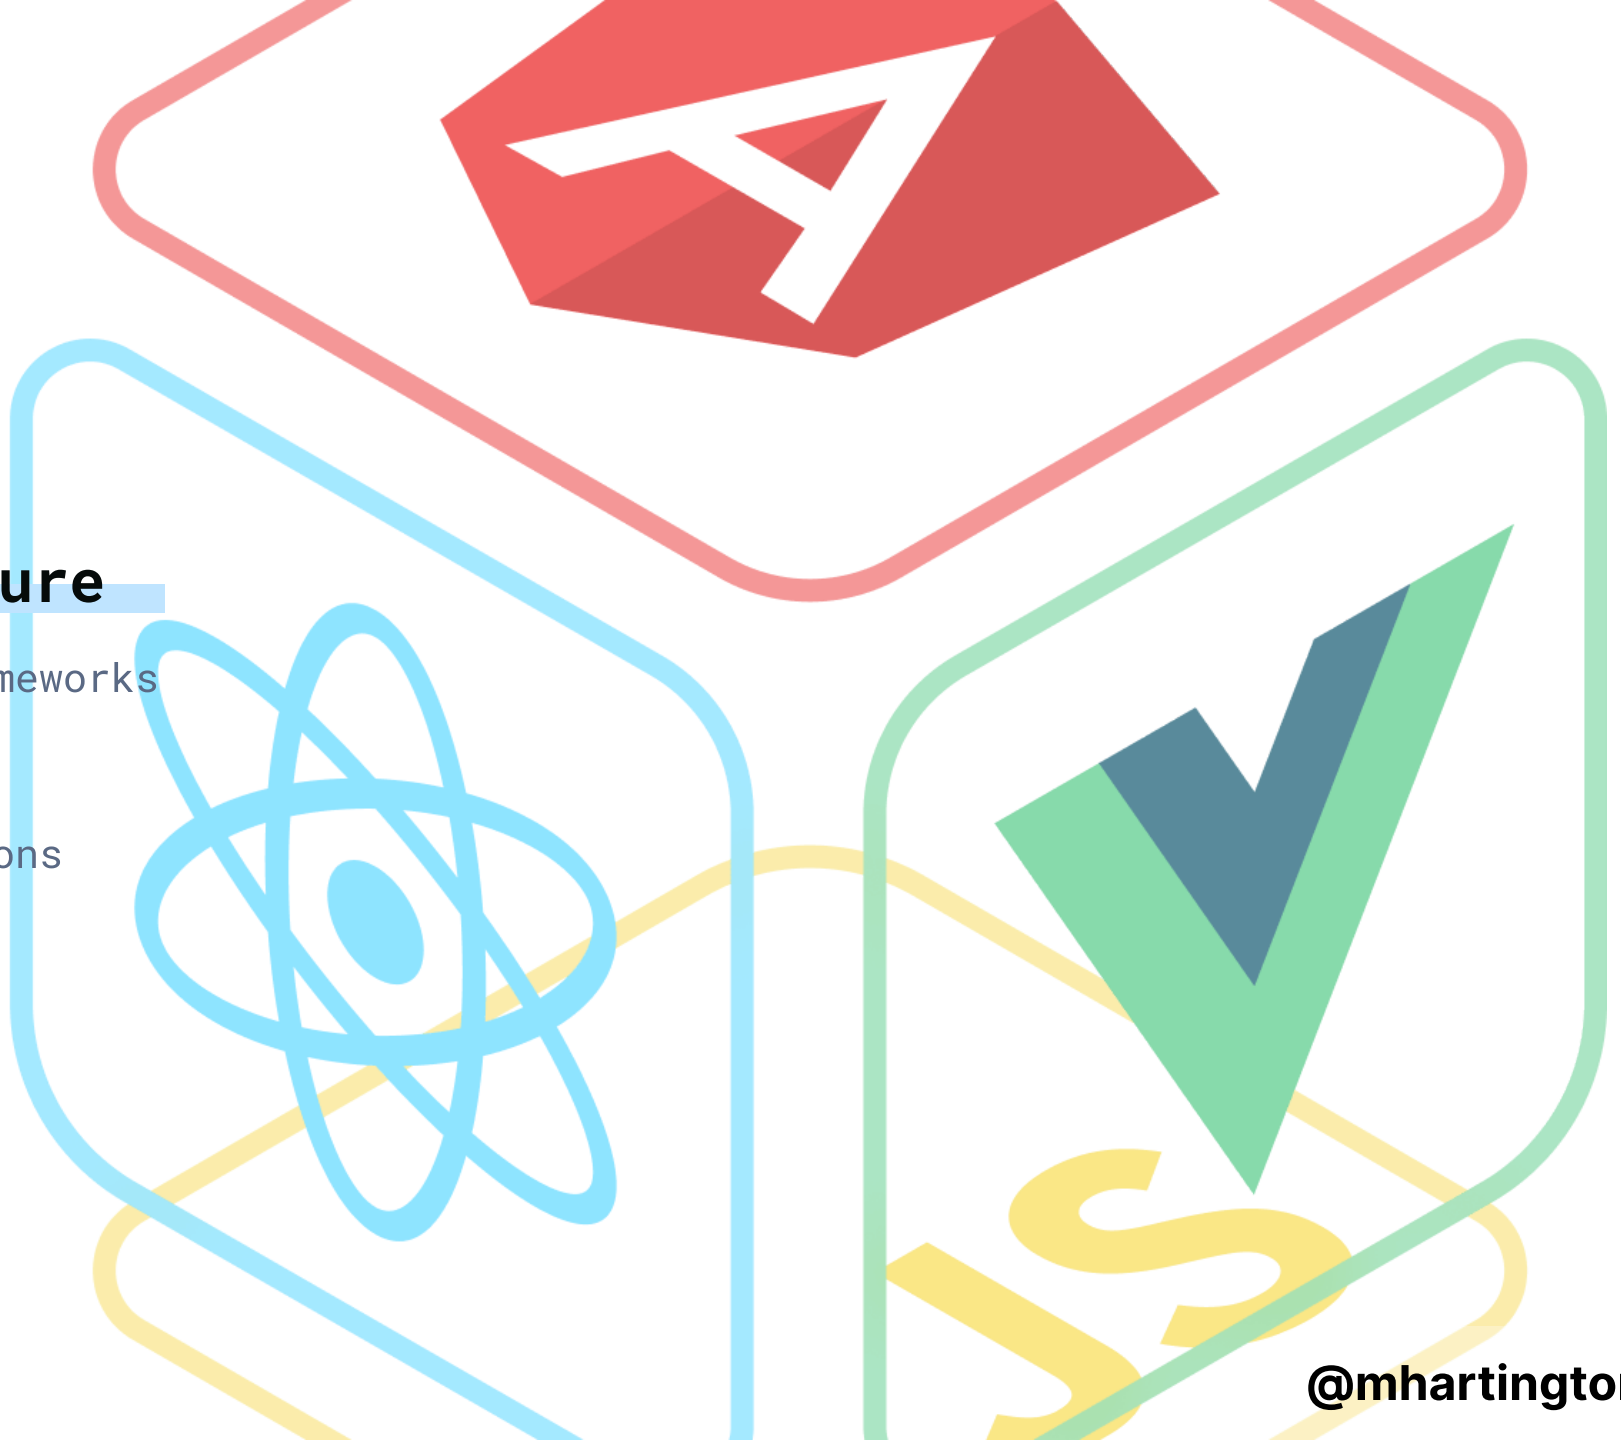


Choose your own adventure

Integrates with most popular frameworks

Components in the "native" API

Router Integration with transitions



@mhartington

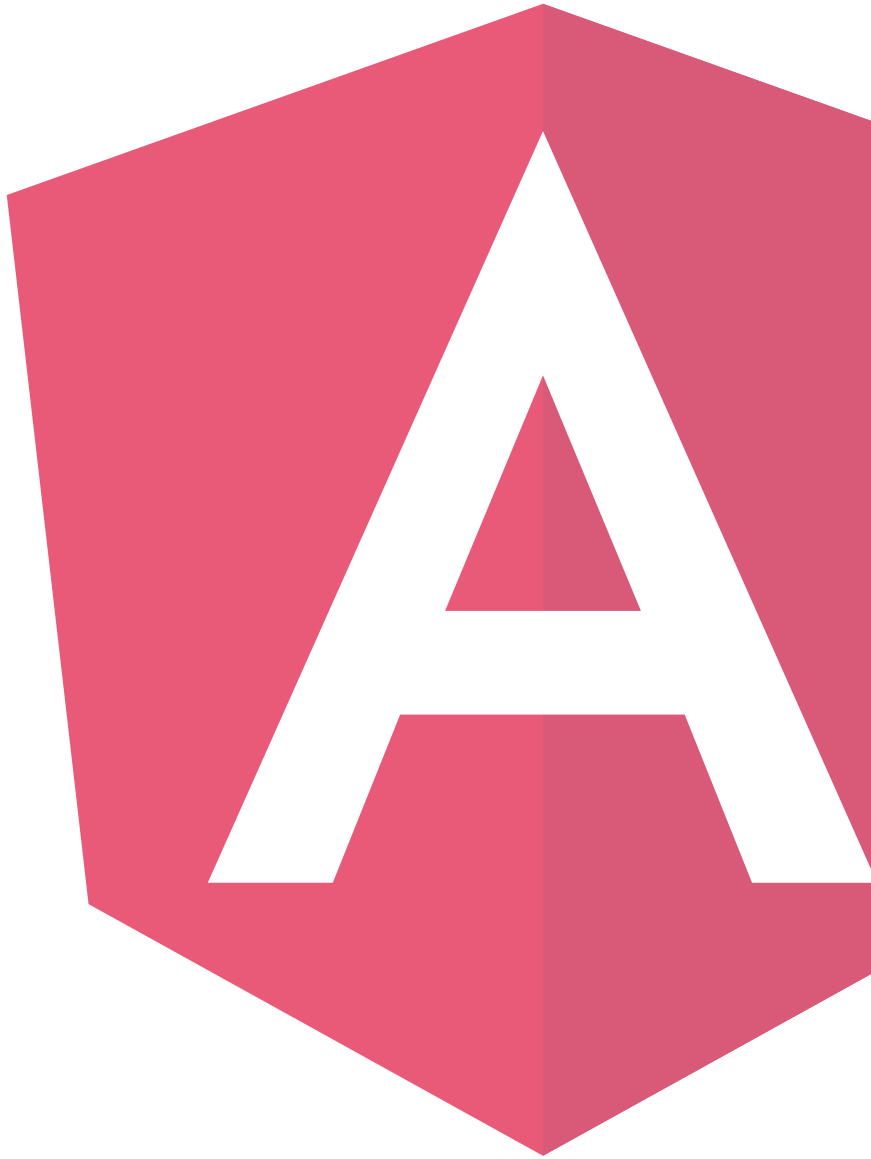
The modern web developer's platform

Template driven design

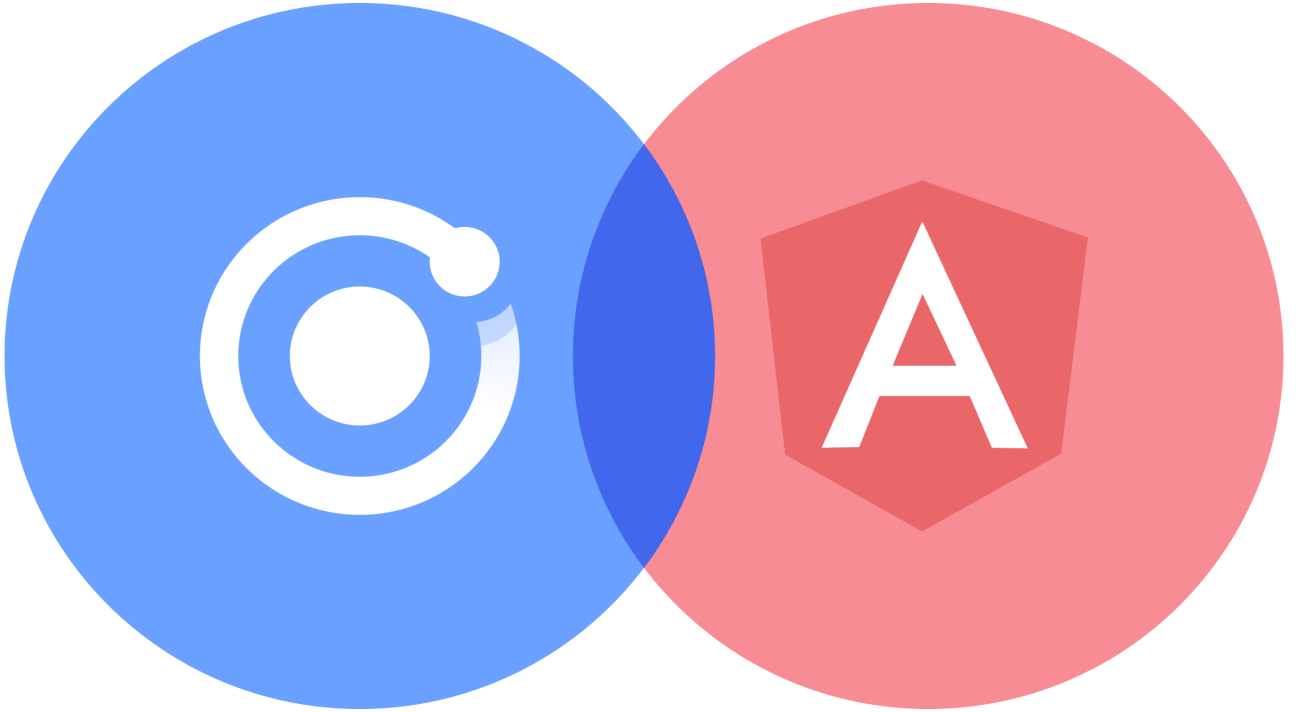
TypeScript as a frist class

Decorators to simplify structure



@mhartington

@ionic/angular: Native Angular components for Ionic



Ionic Components as Angular Components

Router and DevTools Integration

“It’s just Angular”

@mhartington

Demo

```
$ ionic start
```

Ionic & Angular

A Perfect Match.

Angular: A great framework for great apps

Tooling and APIs for scale

Ionic: Provides great platform for great apps

Ionic + Angular = 🎉❤️
